New Engine System **SPACE 5+ PLUS** + New Hydraulic System **SIHIS PLUS** = **5% Reduction in Fuel Consumption**
(as compared with SH350HD-5 [H mode])

New Generation Engine System "SPACE 5+"
The new engine system optimises fuel efficiency and environmental performance via the advanced common rail fuel injection system, cooled EGR system, and turbocharger with W/G (Waste Gate). At the same time, excellent response times are achieved.

Engine and Hydraulics

SH360HD-6 has achieved a 5% fuel saving in comparison with our DASH 5 series, by fusing the new generation engine system "SPACE 5+" and the new hydraulic system "SIH:S+", further refining fuel efficiency. At the same time the newly developed ISUZU engine, contributes greatly to the environment.

Mode Selection by Throttle

There are three working modes available:
SP (Super Power) for heavy duty applications,
H (Heavy) for normal working conditions,
A (Auto) for a wide range of operations.

Further Improvement of Fuel Consumption

The new technology has improved operations and reduced fuel consumption on each working mode.

- H mode **5% Reduction in Fuel Consumption**
- A mode **10% Reduction in Fuel Consumption**
(as compared with SH350HD-5)

*Fuel consumption may vary from time to time depending on site and working conditions, operator skill and other circumstances.

ECO Gauge Showing Low Energy Operation

The energy saving conditions can be seen at a glance, as well as the fuel consumption indicator shown on the monitor.

SUMITOMO Technology for Fuel Efficiency

- SSC (Spool Stroke Control) **SUMITOMO UNIQUE DESIGN**
Reduces engine load upon heavy duty operation.
- BES (Boom-down Energy Save) **SUMITOMO UNIQUE DESIGN**
Lowers engine speed upon boom-down and swing operation which does not require large oil flow.
- AES (Auto Energy Save) **SUMITOMO UNIQUE DESIGN**
Lowers engine speed accordingly when low engine load is sensed.
- PTR (Pump Transition Reduction)
Decreases engine load when the pump flow requirement is reduced upon abrupt pump load.
- Idle Shut Down & Auto Idle

Upon activation, idle shut down automatically shuts the engine down when the machine is not in operation for set amount of time. Auto Idle is also available, which makes the engine begin idling approximately five seconds after the operation levers are in neutral position.

Engine and Hydraulics

SUMITOMO's original technology Spool Stroke Control (SSC), perfectly matches the engine and hydraulic power, and further improves the operational speed whilst maintaining smooth control of the machine.

Work Efficiency Drastically Increased

Spool Stroke Control (SSC) variably controls spool port flow rate, depending on the condition of operation. Improved power, speed, and smoother controls mean that work efficiency is dramatically increased.

Real Digging Power

The true digging force cannot be expressed by a maximum digging power figure listed in sales brochures. With an improved hydraulic system and with a large arm cylinder, the arm-in motion speed slowdown is minimised. The digging power when combined with the attachment speed in motion convert to the operator's "Real Digging Power".

10% Faster Cycle Time (SP mode)

Speed increase by 10% in cycle time has been achieved, giving further advance in productivity (as compared with SH350HD-5 [SP mode]).

Automatic Power Boost

The digging power increases automatically in quick response to the working conditions during heavy-duty digging work. This is a design unique to SUMITOMO, and continues for eight seconds (SP/H mode).

Speed and Power, Increases Productivity Drastically

• SP mode **10%** faster cycle time • H mode **7%** faster cycle time • A mode **7%** faster cycle time
(as compared with SH350HD-5)

*Based on SUMITOMO's testing condition and results.

Operating Condition Easily Viewable on Display

Various control such as working modes and auxiliary hydraulic setting can be easily selected by the universally designed switch panel, and what is being selected can be easily viewed on the 7" wide monitor.

Durability

Heavy duty applications for SH360HD/SH370LHD-6

EMS (Easy Maintenance System) as Standard

SUMITOMO's EMS keeps the pins and bushes fully lubricated at all times and prevents rattling. This system significantly extends the service life of the pins and bushes.

The lubrication interval is 1,000 hours, keeping the joints lubricated for a long time and extending the service life of parts by reducing abrasion and rattling.

EMS bushing

● Greasing interval: 1,000 hours

* The greasing interval depends on the working conditions.

Precautionary use of EMS

- ① Grease is enclosed, however greasing is necessary every 1000 hours or six months depending on the level of dusting conditions.
- ② Greasing is also necessary after any components have been submerged underwater for prolonged periods.
- ③ Greasing is also recommended after use with hydraulic breakers, crushers or other high impact attachments such as Rock Saws etc.
- ④ Bucket pins should be cleaned thoroughly when removing or attaching new buckets.

Sections equipped with EMS bushing

High Rigidity Attachments

The structure of boom and arm has been further improved, ensuring strength and durability. In addition, high strength castings are used for boom base and arm end, improving durability.

High Rigidity Undercarriage

For improved mobility, the track system has been strengthened ensuring longer wear life, performance, and improved durability.

■ Strengthened side frame

• Hydraulic oil change: **5,000** hours

• Life of filter: **2,000** hours

* The oil and filter change interval varies by the working conditions.

Pre-air Cleaner

An automatic exhaust type pre air cleaner is provided as standard. The air cleaner cleaning frequency is minimised, even when operating in dusty conditions.

- Notes: 1. Ratings are based on ISO 10567
2. Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
3. The load point is a hook (not standard equipment) located on the back of the bucket.
4. *Indicates load limited by hydraulic capacity.
5. 0 m = Ground.
